# How JUNKER works?

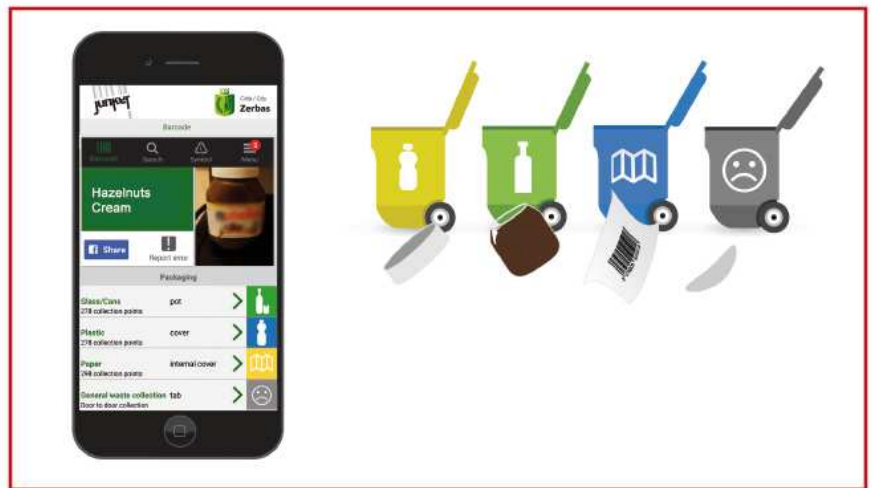

- 1 **Recognizes each product** from its barcode.

- 2 **Separates the packaging** into it's base materials.

- 3 **For each part indicates the correct disposal bin** according to local rules.

## What if the barcode is not available?

- ✓ An extensive **textual search** is available
- ✓ **Scan** the material/recycling symbol

## And what if you change towns?

When in another town just **geo-localise in the App** and **Junker** will help you **dispose your waste according to the local rules**, without doubts or errors!
